Information Regarding the UL Lafayette Departmental Weather Emergency Radios

1. To Stop the radio voice message, press the STOP button.

2. To test the radio anytime, press the RADIO button. You should hear the weather band announcer. Press the STOP button to conclude the test.

3. Do not unplug the radio from the wall.

4. The radio takes four (4) AA batteries, there is a panel on the bottom of the radio to replace these. The radio does NOT have to have good batteries installed in order for it to work.

5. To set the Date/Time on the radio

   - Press and hold the PROG button. “Date/Time” will appear on the display.
   - Press the ENTER button once. The month will blink in the display.
   - Using the VOL buttons, adjust the month correctly.
   - Use the REVIEW buttons to scroll to the day, year, and time fields, each time using the VOL buttons to adjust these settings correctly.
   - Once all date and time fields are set correctly, press the ENTER button once.
   - Press the PROG button once and the correct display will appear.

For additional assistance regarding the radio, please dial 337-482-1840
